

Kyocera Mita introduces industry-leading Multifunction Printers with advanced functionality in a low cost, small footprint design

Premium A4 MFPs offer increased printing speed, environmental efficiency and improved user-friendliness for SMEs

Sydney, Australia – 17th August, 2009 - Kyocera Mita, one of the world's leading document imaging companies, today introduced the FS-1128MFP and FS-1028MFP 28-page per minute multifunctional printers (MFPs).

In keeping with Kyocera's commitment to minimising the impact of its solutions on the environment, the FS-1128MFP and FS-1028MFP are based on Kyocera's tried-and-tested ECOSYS technology. This ensures products are kind to the environment, while being highly economical. The devices also meet Energy Star™ guidelines for power efficiency and utilise long-life consumables for consistent high-quality image output. In both MFPs, the toner is the only item which needs to be replaced periodically and the drum unit every 100,000 pages. They are supplied with a standard duplex function, which, when used consistently, can considerably reduce paper use. This enables users to save money whilst protecting the environment.

Ideal for today's small-to-medium businesses and shared workgroup environments, the Kyocera FS-1128MFP and FS-1028MFP incorporate an extensive list of standard features intended to improve the productivity of any office. The FS-1128MFP and FS-1028MFP include a 250-sheet paper feeder and a 50-sheet multi-purpose tray (MPT). The FS-1028MFP includes standard network printing, copying and colour scanning capabilities; while the FS-1128MFP also includes fax capabilities, providing businesses with the flexibility to meet daily workflow requirements with a single device.

The FS-1128MFP and FS-1028MFP were engineered using Kyocera's ECOSYS technology designed to incorporate long-life consumables and components, and delivers maximum business 'uptime' with an industry-leading 100,000 page preventive maintenance (PM) schedule. This outstanding PM interval creates longer periods of time between required service visits and helps minimise maintenance costs for end-users.

The FS-1128MFP and FS-1028MFP support a variety of network and device management tools, including KMnet Admin and KMnet Viewer. These two devices include PDF Direct Print capability; a software utility that allows users to send PDF files directly to the device. And for added convenience, the FS-1128MFP and FS-1028MFP come standard with a versatile USB Host interface. The front-loading USB Host Interface provides end-users with Print-from and Scan-to capabilities in PDF, TIFF and XPS file formats. This interface makes it easier to work between electronic files and hard copy without a computer, improving overall productivity and workflow efficiency.

Standard network printing includes a PowerPC440/667 MHz processor and 1200 dpi print resolution. The FS-1128MFP and FS-1028MFP support multiple page description languages, including Kyocera's PRESCRIBE, PCL 6 (XL, 5e), KPDL3 (PS3) and XPS, and can be connected in any Windows®, Mac or Linux environment. In addition, the FS-1128MFP and FS-1028MFP offer several standard scanning destinations, including Scan-to-E-mail, Scan-to-PC, Scan-to-FTP, Scan-to-USB and TWAIN scanning, with

resolutions ranging from 200-600 dpi. Users can scan documents in colour or black and white, allowing for greater flexibility when archiving important documents.

For organisations concerned about securing data, Kyocera offers a variety of options.

The FS-1128MFP, FS-1028MFP/DP and FS-1028MFP are embedded with advanced security technologies, which support IPsec and IPv6. A security watermark is also available to deter unauthorised reproduction of documents.

The FS-1128MFP and FS-1028MFP come with a standard 50-sheet reverse automatic document processor that can scan up to 35 images per minute (300dpi; A4, Black and white and up to two 250-sheet paper drawers can be installed for a maximum input of 800 sheets.

Functionality Snapshot

	FS-1028MFP	FS-1128MFP
Functions	Printer, Copier, Scanner	Printer, Copier, Scanner, Fax
Printing Speed	28	28
Time to first print	Approx 6 seconds	Approx 6 seconds
Time to first copy	6.9 seconds	6.9 seconds
CPU	667 MHz	667 MHz
Print resolution	1,200 x 1,200 dpi	1,200 x 1,200 dpi
Memory	256 MB RAM (Up to 768 MB)	256 MB RAM (Up to 768 MB)
Scanning speed	Up to 35 images per minute	Up to 35 images per minute

Scan resolution:	600 x 600 dpi	600 x 600 dpi
Protocols/TWAIN	Scan to PC. Email, FTP, FTP over SSL, USB, TWAIN, WIA	Scan to PC. Email, FTP, FTP over SSL, USB, TWAIN, WIA
FAX	Not available	Standard
Duplex unit	Standard	Standard
Reverse Automatic Document Feeder (RADF)	Standard	Standard

Pricing and Availability

The FS-1128MFP (RRP \$1538.90 incl. GST) and FS-1028MFP (RRP \$1428.90 incl. GST) are now available through Kyocera's national network of distributors and dealers. For further information, please visit www.kyoceramita.com.au.

NZ

The FS-1128MFP (RRP \$1911.38 incl. GST) and FS-1028MFP (RRP \$1742.63 incl. GST) are now available through Kyocera's national network of distributors and dealers. For further information, please visit www.kyoceramita.co.nz.

About Kyocera Mita

Kyocera Mita is one of the world's leading document solutions companies and has been dedicated to helping organisations minimise financial and ecological waste for more than 50 years. Delivering a complete range of printers, copiers and other document management solutions, Kyocera is renowned for its unique ECOSYS® durable imaging system. This enables Kyocera to offer cost-saving printer technology with long-life imaging components that provide greater reliability, are friendlier to the environment and present a significantly lower cost per printed page - resulting in a lower Total Cost of Ownership (TCO) over the life of the product. For further information about Kyocera Mita in Australia and New Zealand, visit <http://www.kyoceramita.com.au> or <http://http://www.kyoceramita.co.nz>
