↑ SCHWANK HEATING

The Schwank STS-JZ is a premier gas-fired infrared radiant tube heating system engineered by a world leader in infrared radiant heating. Built for years of trouble-free operation, the STS-JZ substantially reduces fuel bills (by 35 to 50 percent) with its ability to efficiently convert fuel BTUs into comfortable infrared radiant heat. This unit is perfect for mounting at heights of three to 10 metres in either new buildings or retrofits.

→ WET OR DRY, NO PROBLEM

Kerrick Industrial Equipment has released the VH503PL industrial wet/dry vacuum cleaner. The VH503PL is a 'canister'-type 50-litre vacuum suited to a wide variety of heavy-duty cleaning applications, from general manufacturing and building, to hire, transport and government bodies. This unit features a 1400-watt bypass cooled motor, high-impact polypropylene tank, polyester needlefelt filter, 38-millimetre vacuum hose/tools and eight metres of power cable. For fine dust applications (< 25 micron) paper bags or HEPA cartridge filter are available. Phone 1300Kerrick; there are branches in all states.

← CARTRIDGE-FREE LASER PRINTER

Kyocera's FS-1300D is the latest cartridge-free ECOSYS monochrome laser printer. This compact desktop printer delivers 28 pages per minute with standard duplex printing and a six-second first printout time - critical to businesses printing multiple short simple document jobs. Its powerful controller and 32mb of memory (upgradeable to 544mb) ensures that large document outputs are processed at the lowest cost per page.

↓ HARD FLOORING'S BEST FRIEND

KGS Swiss Diamond Technology has released its FLEXIS FM system, a revolutionary method to maintain your hard surfaces using very fine diamonds as the polishing medium. A success throughout the US, FLEXIS FM makes hard floors easier to clean and maintain. The KGS system removes the need for sealers, lowers ongoing maintenance costs and improves a building's 'green' credentials to leave a bright natural surface.

→ WHAT THE DOCTOR ORDERED

Deb, a global leader in the commercial skin sanitisation market, has just released an alcohol-based foaming hand sanitiser - Deb InstantFOAM, which is the first of its type on the Australian market. InstantFOAM is 99.999 percent effective in killing germs. Conveniently, it requires no water during application and has a hospital-strength formula that kills germs instantly without any sticky residue.
